

# SEVEN HILLS HOSPITAL

## ADOLESCENT DRUG & ALCOHOL DETOX & REHAB

### YOUTH DETOX PROGRAM

Seven Hills Hospital's youth detox program offers our patients a treatment specific program and the medical supervision needed to safely withdraw from drugs and/or alcohol. Medically managed withdrawal is only the beginning of the recovery process and is administered in a safe, confidential, and clinical environment that ensures the least amount of discomfort during treatment. Our medical and clinical team focuses on relapse prevention and puts forth every effort to ensure that the patients going through detox receive excellent service at every level.

### YOUTH REHAB PROGRAM

Our youth rehab program uses a holistic approach to treatment that is centered on healing the mind, body, and spirit. We guide our patients in recognizing the areas of improvement and choices that are required to make a positive change in their lives. Our patients reside in comfortable living quarters and gain a better understanding of addiction through our treatment services.

Improving the quality of life for our patients, their families and the community.
